

The Honorable Shulley C. Chapman

Over the past eight years I have been battling heart disease. I culminated in having open heart surgery, four by-pass and repairing an aortic aneurysm, on October 1, 2012.

There are many other physical ailments I am currently being treated for medically, i.e. osteoarthritis, crippling arthritis in extremities, asthma/respiratory problems, paralyzed diaphragm, thyroid related issues.

What the future holds for my medical conditions are uncertain, but to be denied insurance through the ACA could be financially devastating.

I sincerely hope that much consideration
will be given in reference to maintaining
insurance coverage as a supplement.

Many thanks

Mr. and Mrs. Albert Bell

The above medical problems pertain to
my wife, Norma Bell.
