

The Honorable  
To Whom it Concerns: Shelley C. Chapman  
Pg 1 of 2

I am writing on behalf of my mother, Clovia Allen. She is a retired coalminer for Peabody and worked for Harris No 1 - local 9503. She has given 23 years of service to the coal industry. And is very concerned about her insurance and retirement funds. She desperately needs her medication for survival. She was diagnosed with MSA which is a debilitating disease. And there is no known cure for this particular disease. And also is dealing with Parkinson's. She was diagnosed with this disease about 2 and 1/2 years ago. Her medicine is very important to her everyday survival. She also has to make visits to the Cleveland Clinic for her treatments of Botox for her muscle and joints that help manage the pain. It is very important for her to continue with her daily medication.

Without any interference. She's very concerned for her well being as well as her family - And she's willing to have any kind of input on behalf of her and her fellow-retirees to keep their coverage and funds that will help them survive on a daily basis. Without her medicines it would be impossible for her to carry on with her everyday living. We hope and pray that you can see fit to keep their coverage and benefits going.

It means so much for her to know that she can continue with her meds and doctor visits. Please remember all the other retired miners who are affected by this decisions and know that we appreciate all that you can do to help us with our way of living our daily lives. Please know that Jim available for any kind of help on this matter. Thank You.

phone# 304-934-7719 So very much. Libby Allison  
Daughter of Alvin Allen
