

10-1-12

Dear Honorable Shelley C. Chapman,

I writing this letter to let you know if I lose my Retirement Health Insurance that I worked all those years for, I would face losing everything. I have lung cancer. I know if I did not have my health insurance, I could not afford to have the chemo and all the other medical treatments necessary to extend my life. I know that my wife and I need my health insurance that I was promised all those years. I would have to sell what I own to pay medical bills. I did not want to leave this life and have my wife in medical debt. I would like to ask you a question, "Are you working for your retirement and health when you retire?" How would you manage if someone would take it away. I never knew how much having my health insurance meant until I got lung cancer. I want to live to see my granddaughter grow up. I want to grow old with my wife. So please do not

let Patriot Coal take our
Retirement Benefits from us.
Thank you, so much for reading
this letter.

Thank you,

Charles H. Britt
